

11 1 NOV 2025

Seat No: _____

BCA Semester – 3 Examination (NEP)

Object Oriented Programming using C++ I

Subject Code – 25737 (Credit – 3)

Time: 1 Hour 15 Minutes

Total Marks: 35

Q-1 What is OOP? Explain concept of OOP. [10]

OR

Q-1 (A) What is class in C++? Explain structure of C++ program. [05]

(B) Explain input and output statement of C++ with example. [05]

Q-2 What is the use of Constructor in C++? Explain all types of Constructor in detail with example. [10]

OR

Q-2 (A) Explain Friend Function with two class example. [05]

(B) What is the use of Destructor? Compare Constructor with Destructor. [05]

Q-3 What is Type Casting? Explain any two type of cast conversion of your choice. [10]

OR

Q-3 (A) Explain with example: Binary operator overloading [05]

(B) Write rules for Operator Overloading. [05]

Q-4 Give the answer of any **FIVE** questions out of **SIX**. [05]

1. Which of the following operator cannot be overloaded using friend function?

(A) > (B) - (C) [] (D) +

2. Which of the following access specifier is used by default in a class definition?

(A) private (B) protected (C) public (D) friend

3. Which header file include the definition of 'cin' and 'cout'?

4. Which of the following type of data member can be share by all instances of its class?

(A) public (B) static (C) inline (D) friend

5. Which keyword is not present in C++?

(A) inline (B) delete (C) operator (D) cout

6. In C++ _____ operator is used for dynamic memory allocation.
